

NKI-AVL WEBINAR

INTRODUCTION IN CANCER DIAGNOSIS AND TREATMENT, INCLUDING IMMUNOTHERAPY AND TARGETED TREATMENT IN DIFFERENT CANCER TYPES AND THE ROLE OF NURSES AND NURSE PRACTITIONERS.

TUESDAY 9 JUNE 2026 (15:00 - 16:00HRS CEST)

Empowering Nurses in Cancer Care: A Comprehensive Introduction

The Netherlands Cancer Institute – Antoni van Leeuwenhoek (NKI-AVL) is proud to present a series of webinars designed to equip healthcare professionals with essential knowledge and skills in cancer diagnosis and treatment. Tailored for nurses, nurse practitioners, and paramedics, these courses address the unique challenges in understanding and applying cutting-edge oncology practices, including immunotherapy (IT) and targeted therapies (TT).

Nurses and nurse practitioners play a vital role in managing patients receiving cancer treatment. This programme highlights their contributions in clinical support, patient education, and the management of side effects, empowering participants to enhance patient outcomes effectively.

Key Learning Objectives:

- Understand the fundamentals of cancer diagnosis, staging, and treatment, including TT, IT, and cell therapies.
- Explore treatment approaches for melanoma and renal cell cancer.
- Recognise the benefits of TT and IT in improving survival and quality of life.
- Identify and manage adverse events related to modern cancer therapies.
- Learn the principles of genetic sequencing, biomarker testing, and molecular imaging techniques.
- Gain insights into the evolving role of nurses in oncology care, informed by real-world expertise at NKI-AVL.

Join us in this engaging webinar series to build a strong foundation in oncology care and support patients through innovative therapies.

We look forward to having you join us.

PROGRAMME HIGHLIGHTS

TUESDAY, 9 JUNE FROM 15:00 - 16:00HRS CEST

- **Prostate cancer: current diagnostic and therapeutic options!** by Erik van Muilekom, Nurse Practitioner Urology and Arthur Braat, Nuclear Medicine Physician, NKI-AVL

Prostate cancer is the second most commonly diagnosed cancer in men and one of the big five cancers globally. Although the disease is often curable in localized stage and men with an advanced stage of the disease can be treated with long-term stabilization and different palliative options, unfortunately, men also die from prostate cancer. In this webinar, we will discuss prostate cancer from diagnosis to treatment including different diagnostic and therapeutic options available in radiology and nuclear medicine anno 2026.

Moderator: Marcel Stokkel, Dean AVL Academy

WHO ARE THESE WEBINARS ORGANISED FOR?

These webinars are organised for healthcare professionals, like nurses, nurse practitioners, paramedics.
